What happened to the energy infrastructure in Somalia?

When the 1991 uprising threw Somalia into a lasting civil war, the nationalized energy infrastructure was completely privatized overnight without regulation. What happened immediately was a total blackout with almost no electricity accessible to the country.

How much electricity does Somalia have?

Despite the widespread use of generators, Somalia has only 106 MW of power nationwide, according to the United States Agency on International Development. The World Bank reported in 2018 that 64% of Somalis didn't have access to electricity.

How much power does BECO produce in Somalia?

Currently, BECO produces 35 MW of power for eight cities, which is much less than its demand of 200 MW. Many Somalis avoid using electricity in order to avoid the monthly costs as 69% of Somalis are currently living in poverty. Power companies in Somalia heavily rely on imported fossil fuels for diesel-powered generators.

Somali Solar is self-funded private organization with a history of renewable energy in the United States and Somalia. Our service is first of its kind in the whole of Africa. with Warranties going beyond 5+ years and competent technician trained by leading Solar Installation industries

Because Somalia struggles with a lack of electricity and high electric costs, BECO's new solar power plant has the potential to positively impact many people's lives. When it opened, the power plant had the capacity to produce 8 MW.
