The Iaunanen system, like a small solar home system, has been designed to power five LED lights, one light with emission spectrum suitable for cyanosis detection, one LED light bar and one phone charger in the village dispensary. This system simply connected a 220W PV module with a 130Ah battery through a BlueSolar MPPT 75/15.

perfect because solar modules produce 95 percent of their full power when within 20 degrees of the sun's direction. Roofs that face east or west may also be acceptable. As an example, a due west facing rooftop solar PV system, tilted at 20 degrees in Salem, Oregon, will produce about 88 percent as much power as one pointing true south at the
