Should you invest in solar energy stocks in 2024?

Investing in solar energy stocks in 2024 presents an opportunity due to several factors. The global push for renewable energy sources intensifies, with a heightened focus on combating climate change and reducing carbon footprints. Solar energy remains a pivotal component of this transition towards clean energy solutions.

Why are solar energy stocks growing?

The industry's technological advancements and decreasing production costs make solar energy increasingly competitive against conventional energy sources. In addition, government incentives, supportive policies and increasing consumer demand for sustainable energy further drive the growth prospects of solar energy stocks.

How did solar energy stocks perform in 2023?

Solar energy stocks took a beating in 2023. Global X Solar ETF (RAYS) and Invesco Solar ETF (TAN) are down 41.38% and 29.83% for the year, respectively. The high-interest rate environment made a bearish case for solar stocks throughout the year due to a demand drop among retail customers.

Why are solar stocks a bearish investment?

The high-interest rate environment made a bearish case for solar stocks throughout the year due to a demand drop among retail customers. Moreover, California's Net Energy Metering 3.0 policy has reduced incentives for rooftop solar owners drastically.

Why are countries investing in solar panels?

Countries around the world are investing in the manufacture of solar panels to decrease their dependence on fossil fuel-based energy projects. The war in Ukraine, which cut off Europe from Russian energy sources and sparked a crisis, acted as a catalyst for this change.
