

Can a solar roof power a home?

Install Solar Roof and power your home with a fully integrated solar and energy storage system. The glass solar tiles and steel roofing tiles look great up close and from the street, complementing your home's natural styling. Schedule a virtual consultation with a Tesla Advisor to learn more.

Can a solar roof be used with a Powerwall?

Combine your Solar Roof with Powerwall--a home battery featuring an integrated solar inverter for increased efficiency and dependable energy storage 24/7. With the Tesla app, you can monitor your energy production in real time. Control your system from anywhere with instant alerts and remote access.

Will my roof generate solar energy?

Realistically, your roof's solar generation potential will be less than that. It'll likely still exceed your typical household energy needs, but real-world constraints like roof space, sunlight exposure, and equipment specifications play a huge role in your panels' actual generation.

Does Tesla offer a solar rental service?

Tesla is launching today a solar rental service- a brand new way to get a solar panel system on your roof for as little as \$50 per month without any long-term contract.

Why should you install solar panels on your roof?

Proprietary hardware and streamlined installation help to minimize impact to your roof. Rail-free mounting keeps panels close to your roof and panel skirts hide hardware and edges from view. Solar panels generate energy for you to use in your home. When paired with Powerwall, you can store your excess energy for use whenever you want.

What is solar roof & how does it work?

It stores the energy you produce with Solar Roof so you can power your home anytime--at night or during an outage. Solar Roof is comprised of both glass solar tiles and steel roofing tiles. Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof.
