Approximately 2,300 SolarWorld modules will now produce clean solar power on the island. Through the use of solar power around 300,000 liters of diesel can be saved each year. Like many small islands, St Helena has mainly relied on diesel generators for ...

In 2009, having now engaged with WES (who had taken over the failed Lagerway business) an additional three wind turbines were purchased, the original three overhauled and through a robust maintenance program wind started to play a part in St Helena's energy mix. April 2014 saw the doubling of the fleet with twelve wind turbines now operational.

The completion of the East St. Louis farm is just the latest investment in solar for the region's largest energy provider. CEJA is also funding another similar Ameren Illinois project in Peoria. Ameren Missouri acquired a facility in Beardstown, Illinois, earlier this year that will produce 150 megawatts of power. Another in northeast ...

Our Community Solar Energy Farm Program is designed to allow landowners to have ownership stakes in the solar farm on their property. This means you can directly benefit from the revenue generated by the solar farm, in addition to other income streams such as land lease payments and crop production. By owning a part of the solar farm, you not ...
