

Vietnam aims to have half of its office buildings and homes powered by rooftop solar panels by 2030, under a master power development plan approved by the government in May last year.

Finding the right solar installer for your roof is important in ensuring a hassle-free installation that you are satisfied with. Already convinced by the benefits of solar for the environment, your electricity bills and more but overwhelmed by tasks like assessing roof suitability or choosing solar panel types?

Rooftop PV in Vietnam along with the status of Solar Rooftop in Danang and HCMC. It also covers global learnings on Rooftop PV models implemented in United States of America primarily New York and California,

A grid-tied solar power system helps households: Sell electricity to EVN at the price of UScent 8.38/kWh (at the current exchange rate of VND 1,940/kWh) within 20 years. With an investment for this system of about 13-16 million VND/1kWp (depending on the installation location and roof structure), the payback period only takes about 4-5 years.

State-owned Vietnam Electricity (EVN), the nation's sole power distributor, may purchase excess rooftop solar power from homes and offices at VND671 (2.6 cents) per kWh. A proposal to this effect has been made by the ...

Self-use rooftop solar power not connected to the national grid or with a capacity of less than 100 kilowatts (kW) can be developed without limit and exempted from the need for electricity operation licences.

This decree aims to establish a regulatory framework for the development of self-consumption rooftop solar power systems in Vietnam. In this legal update, we will explore the key provisions of the draft decree and its potential implications for ...

The Vietnam rooftop solar sector is set for a major boost with a new draft decree published in early October 2024, introducing fresh policy guidelines to promote self-produced and self-consumed solar energy.

State-owned Vietnam Electricity (EVN), the nation's sole power distributor, may purchase excess rooftop solar power from homes and offices at VND671 (2.6 cents) per kWh. A proposal to this effect has been made by the Ministry of Industry and Trade (MoIT) at the request of Deputy Prime Minister Tran Hong Ha, who'd asked for a scheme to buy ...

Thin-film Solar Panels: These are the most affordable type of panel, but they are also the least efficient. They might be a good option for south-facing roofs with limited space, as they perform well in low-light conditions.
