## **SOLAR PRO.** Solar panels on rooftop Greece

The Greek government has actually officially fired the beginning weapon of a EUR-238-million (USD 261.8 m) programme that will certainly subsidise the installment of rooftop solar systems coupled with battery storage. The programme, dubbed Photovoltaics on the Roof, is open to households as well as expert farmers.

The Greek government has officially fired the starting gun of a EUR-238-million (USD 261.8m) programme that will subsidise the installation of rooftop solar systems coupled with battery storage.

The report examines EU Member States (Bulgaria, France, Germany, Greece, Italy, Latvia, Lithuania, Portugal, Romania, Spain and Sweden) on their good and bad practices when it comes to facilitating rooftop ...

The online platform where citizens and farmers can submit applications for subsidy via the state program "Photovoltaic on the Roof" opened at 2 " o clock Tuesday afternoon, May 2, 2023. The program enables thousands of households and farmers to generate the electricity they need and save money, the energy ministry said.

Rooftop photovoltaic panels combined with power storage will be subsidized by the state to up to 60% of their cost, an Energy Ministry official told the Renewable and Storage Forum on Thursday. Subsidies are for units up to 10 kilowatts, with the program's details to be unveiled for a period of public consultation within the next two weeks.

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs introduced and the corresponding regulations for domestic applications of rooftop solar PV. However, funding the FITs created an unacceptable deficit of more than EUR500 million in the Greek "Operator of Electricity Market" RES fund. To reduce that deficit, new regulations were introduced in August 2012 inclu...

In addition to subsidizing rooftop photovoltaics, the government has also enacted a EUR 100 million program for 120,000 solar thermal rooftop systems, with a subsidy level of 60% and a maximum support level of EUR 900 per household.

The solar power system is a mechanism that is placed on the building's roof, that produces electricity. For example, in Crete such a mechanism produces in 1KW system power around 1450Kwh per year. The selling price for the produced energy is 0,55 EUR / kwh and it is multiple to the current price we buy it.

The report examines EU Member States (Bulgaria, France, Germany, Greece, Italy, Latvia, Lithuania, Portugal, Romania, Spain and Sweden) on their good and bad practices when it comes to facilitating rooftop solar deployment in the EU.
