There really is no downside to owning your own solar power system, and the upside is significant. With decreased energy costs, guaranteed long-term investment, a reduction in your carbon footprint, the comfort that you are not reliant on utilities, and the lowest historical install costs are just some of the great reasons to make the jump.

You still need a grid connection, the solar panels don't make enough power to go off grid during the winter. If you make more electricity than you use, you get a credit in your &quot;energy bank&quot; which you can use at a later date (1 credit = 1 KWH). Years ago, they used to pay you for the excess energy but now it's just this credit system.

Factors That Influence The Costs of Solar. Going solar in Rhode Island can be a wise move for numerous homeowners because of the substantial potential savings on monthly utility bills and its eco-friendly

contribution. The price of solar panel installation in Rhode Island is shaped by several variables, such as your household's energy needs, the particular solar ...

A common misconception about solar panel systems is that they automatically continue to produce electricity if the grid goes down, so long as the sun is shining. All inverters are required to be able to be “anti-island.” In other words, solar inverters are explicitly designed not to allow your solar panels to continue to push electricity into your home in the event of an outage.
