

Who built the largest solar power plant in North Macedonia?

Slovenia's energy group GEN-I completed the construction of the largest solar power plant in North Macedonia and connected it to the grid in September, four months ahead of the government's deadline.

How will a new solar plant help Macedonia?

Andi Aranitasi, EBRD Head of North Macedonia, said: "The new solar plant will help the country, which faces severe air pollution from coal, to reduce its reliance on ageing coal-fired infrastructure. It will also generate cheap electricity in times of very high market prices.

Why is Gen-I launching a solar power plant in North Macedonia?

The start of operation represents an important milestone for the expansion of GEN-I in the implementation of large solar power plant projects and the production of carbon-free electricity as well as a key contribution to the so-called Green Scenario of North Macedonia under the Strategy for Energy Development.

Which country has the largest solar power plant in Bosnia & Herzegovina?

Right after a 45 MW facility in Bosnia and Herzegovina entered a trial phase, North Macedonia again became the country with the largest one in the region. Mey Energy said it finished its 55 MW solar power plant in the municipality of Novaci, in the heart of the country's coal industry. The system was built next to the Suvodol open pit.

Where is Gen-I solar power plant located?

Slovenia-based GEN-I connected its 17 MW solar power plant southeast of Skopje to the grid four months before the deadline. It is the largest photovoltaic facility in North Macedonia and the Western Balkans.

Which country has the largest solar power plant in the region?

It is currently the largest in the region. The Western Balkans are slow in the deployment of solar power, but the list of utility-scale photovoltaic units is gradually becoming bigger. Right after a 45 MW facility in Bosnia and Herzegovina entered a trial phase, North Macedonia again became the country with the largest one in the region.

The Slovenian Gen-I Group has inaugurated a solar power plant with an installed capacity of 12 MW near Kavadarci, North Macedonia. This facility is expected to generate up to 15,500 MWh of electricity annually, significantly contributing to the country's decarbonization efforts.

The largest solar power plant in North Macedonia - a 17-MW facility in the municipality of Sveti Nikole - commenced commercial operations this week. Solar power plant in Azambegovo, North Macedonia.

The first large-scale solar plant in North Macedonia has been connected to the power grid and is already

producing clean electricity. The plant has been financed with the support of the Western Balkans Investment Framework (WBIF) bilateral donors and the European Bank for Reconstruction and Development (EBRD).

Right after a 45 MW facility in Bosnia and Herzegovina entered a trial phase, North Macedonia again became the country with the largest one in the region. Mey Energy said it finished its 55 MW solar power plant in the ...

Solar power plants are planned to be built within public-private partnerships in the TIDZ industrial zones in North Macedonia. They are set to supply manufacturers exporting their products to the European Union, ...

Slovenia-based GEN-I connected its 17 MW solar power plant southeast of Skopje to the grid four months before the deadline. It is the largest photovoltaic facility in North Macedonia and the Western Balkans.

Solar power plants are planned to be built within public-private partnerships in the TIDZ industrial zones in North Macedonia. They are set to supply manufacturers exporting their products to the European Union, enabling them to avoid the CBAM carbon border tax.

Additional investments in solar power plants are planned in North Macedonia. The WBIF has already approved financing for an extension of the plant in Oslomej 2 and the construction of a new plant in Bitola for a combined total capacity of 30MW. The EU is supporting this investment with a EUR5.1 million investment grant.

Operations start at GEN-I's second large solar power plant in North Macedonia With a total power of 12 MW, the plant will generate up to 15,500 MWh of carbon-free energy a year, thereby helping to decarbonise the energy system.

Right after a 45 MW facility in Bosnia and Herzegovina entered a trial phase, North Macedonia again became the country with the largest one in the region. Mey Energy said it finished its 55 MW solar power plant in the municipality of Novaci, in the heart of ...
