I charged a Nitecore F21i (18Wh) and NB10000 (38.5 Wh) battery. So to charge 5000 mAh battery (18Wh) requires about 5 hours of full sun AND keeping the solar panel properly oriented which is not going to happen unless you are stopped and paying attention. My phone battery is 12Wh and depending on usage, I would use 1Wh to 10Wh per day.

However, one exception is the BioLite SolarPanel 5+. It's a combined solar panel and battery pack that impressed me during testing. The Best Solar Power Bank: BioLite SolarPanel 5+ Laura Lancaster. See It ... If you're looking for a solar power bank as a home emergency backup to keep your phone running when the grid goes down, this is what ...

*whichever occurs first. Powervault 3. Powervault is a UK-based company with a mission to lower people's electricity bills and carbon footprints. Their most popular solar battery is the Powervault 3, and for good reason too. One of the main selling points of the Powervault 3 is that it is installed as an AC-coupled system directly into the electrical supply on your home's fuse box.
