

Does Project Sunroof have solar data?

We currently have solar data for portions of 50 states and Washington DC. See if we've got you covered. Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.

How do I get a solar estimate?

Simply enter a state, county, city, or zip code to see a solar estimate for the area, based on the amount of usable sunlight and roof space. Enter a state, county, city, or zip code to see a solar estimate for the area, based on the amount of usable sunlight and roof space.

How does the roof calculator work?

NB: the calculator is not for private use. How it works: Select your location, roof type and solar panels Draw the roof and any obstacles The calculator automatically selects the most suitable mounting system Immediately download the bill of materials, and the construction and ballast plan

Why should you choose esdec for a roof installation?

Every installation is different. Roof type, roof size, environmental factors and types of mounting systems. They all have an impact. When starting a new project, you can count on Esdec's support. We will help with a construction plan and bill of materials. They are the basis for every project.

Explore the solar photovoltaic (PV) potential across 17 locations in North Macedonia, from Kumanovo to Bitola. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV ...

STEP 2: Identify the North facing rooftop. North is directly up on the screen (Southern Hemisphere). * Note: Estimate may not be accurate if roofline is not within ten degrees of True North. STEP 3: Highlight the edges of your North ...
