

With our Solaribbean partners, we were retained to provide our international experience serving The Anguilla Electric Company as a consultant providing our professional oversight for quality control, construction, and the commissioning of this large ground mount solar farm on the Caribbean island of Anguilla.

The Anguilla Electricity Company (ANGLEC), one of the island's most financially successful statutory bodies, has broken ground for a 3.3 million US dollar one megawatt solar farm to produce about 10% of Anguilla's total energy needs.

With oceanfront suites, a hammam-anchored spa, and an intimate rum room, Anguilla's Zemi Beach House has five stars -- and nearly 3,000 solar panels. Installed this past winter, a solar farm runs adjacent to the Caribbean resort and ...

In 2019 Comet Solar installed an 8-kW rooftop solar PV plant in Island Harbour, Anguilla. By installing a Sonnen storage system and using Solar-Log's control technology, the plant owner is able to make use of the solar ...

The green scrub has been removed and replaced with blue and silver solar panels. This is the location where the Anguilla Electricity Company Ltd (ANGLEC) took its first step into the arena of renewable energy by constructing a ...

With our Solaribbean partners, we were retained to provide our international experience serving The Anguilla Electric Company as a consultant providing our professional oversight for quality ...

The solar PV plant is CDB's sixth intervention in the energy sector in Anguilla, and supports the Government of Anguilla's goal of transforming the country into a low carbon economy. The country has set a national target of producing 30 percent of its electricity from renewable sources by 2030 and cutting greenhouse gas emissions.

The Anguilla Electricity Company (ANGLEC), one of the island's most financially successful statutory bodies, has broken ground for a 3.3 million US dollar one megawatt solar farm to produce about 10% of Anguilla's total ...

In 2019 Comet Solar installed an 8-kW rooftop solar PV plant in Island Harbour, Anguilla. By installing a

Sonnen storage system and using Solar-Log's control technology, the plant owner is able to make use of the solar power produced while limiting the amount of power exported to the grid.

Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030. Presently Anguilla's energy mix is comprised of only 4% renewable energy. Its electrical demand peaks at 16MW and its electricity prices are high relative to the rest of the Caribbean.
