The final cost of your solar panel system in Spain is influenced by several key factors. Here's a breakdown of the major players: ... Compare quotes from several installers to get a competitive price and understand the scope of work included. Read Reviews and ...

Still: One of the main drawbacks of the Prosol programme until today has been its lack of diversified customer target groups. According to the Andalusian Energy Agency, 98% of the 36,193 solar systems were set up by residential clients, meaning 89 % of all investments subsidised between 2009 and today were made by owners of private homes.

The average installer solar energy system salary in Spain is 38.771 EUR or an equivalent hourly rate of 19 EUR. Salary estimates based on salary survey data collected directly from employers and anonymous employees in Spain. Menu. For Employers For Employers. For Employers. Check out the Assessor platform and get access to our salary data for ...

Following the Spanish government's move a couple of years ago to crack down on households generating their own solar power, switching to the renewable energy has generally been seen as not being viable for the average individual. The infamous royal decree 900/2015, which came into effect in October 2015, effectively raised the costs of running your own solar setup.
