

Does Guernsey have electricity?

Over 93% of electricity in Guernsey is renewable. Our island's imported electricity is sourced from 100% renewable energy, including solar, wind and hydroelectricity. This is brought into the island through a subsea cable and distributed to every home and business using an underground network of cables.

Why should you choose Electric in Guernsey?

In Guernsey today, over 90% of the electricity we use annually comes from renewable sources such as hydro, wind and solar power. So when you choose electric - whether to heat your home, drive around, or cook your dinner - enjoy peace of mind that your choice is helping Guernsey take a step towards a cleaner, greener future for our island.

Will Guernsey's new electricity strategy come after a long-term deal?

A leading businessman has criticised Environment and Infrastructure's (E&I) new electricity strategy for Guernsey. Jon Moulton said the strategy should come after a long-term deal on power supply has been signed with French energy suppliers. The current deal for electricity supply with French energy supplier EDF is set to run out in 2027.

This innovative development aims to generate 2.965 MWp so, not only would it boost the island's energy security and resilience, it would be a huge step toward achieving the States of Guernsey's 2020-2050 Energy Policy and shaping a greener future for Guernsey.

The Little Green Energy Company have just installed 309 roof mounted solar panels with Guernsey Electricity Limited on the power station, Northside, Vale, creating the largest solar array in the Channel Islands, generating over 100kWp of power.

Solar panels can help lower your electricity bills and they only require daylight to work, even if the sun is not shining you are still getting free electric! Here at Island Electrics Ltd, we can help consult and advise on what would be best for your property as well as look after your installation with full servicing.

4 ???&#0183; "The development is of a significant scale in the context of Guernsey for solar, with available land for large scale projects being limited," he stated in the planning report. "It is understood that we are approximately 50% of the way to the 2025 target of 5MW total installed solar within the island, and the development of this project ...

If you're looking to install your own renewable energy system, we'll help you design and install a system that is suitable for your needs, your property and your budget. Please note that we currently do not supply and install solar PV, but we do offer a maintenance and repair service.

6 ???&#0183; This innovative development aims to generate 2.965 MWp so, not only would it boost the island's energy security and resilience, it would be a huge step toward achieving the States of Guernsey's 2020-2050 ...

Guernsey has already started on-island renewable generation with community-scale solar arrays feeding over 350kW of renewable solar power into the grid. This means that no matter your property size, a portion of your electricity will always come from on-island solar energy.

Solar panels can help lower your electricity bills and they only require daylight to work, even if the sun is not shining you are still getting free electric! Here at Island Electrics Ltd, we can help ...

We believe that everyone in Guernsey should be able to use and benefit from renewable electricity. Guernsey Electricity has installed some of the largest solar arrays in the Channel Islands which feed more than 600kW of ...
