SES AI, formerly known as SolidEnergy Systems, said it has signed a joint development agreement (JDA) on the world's first Li-Metal B samples with an unidentified global automaker. Industry sources said one of its automotive partners - GM, Hyundai Motor and Japan's Honda Motor - is the carmaker with which SES has signed the JDA.

SES AI's newest facility is in Chungju, South Korea. Equipped with expanded in-house manufacturing capability, the new facility further enhances SES AI's global cell engineering capability, serving as a strong complement to SES AI's Shanghai facility in the steady production of large-format 50Ah and 100Ah Li-Metal cells.

SES AI is pioneering next-generation Li-Metal batteries for electric transportation both on land and in the air. It is also using AI to accelerate pipeline material discovery, detect manufacturing defects, monitor battery state-of-health and predict incidents, for both Li-Metal and Li-ion.
