

SustainPower provides innovative and sustainable energy solutions that empower businesses and communities. Our experts design and manufacture high-quality, durable power generation and energy storage systems. With a focus on environmental responsibility and cutting-edge technology, we aim to transform how developing economies access and use energy.

KTE's focus on next-gen energy production revolves around deploying cutting-edge technologies and innovative approaches to maximize the efficiency and sustainability of energy generation. By integrating electrolysis capacities and renewable energies on an impressive site in South Africa's Northern Cape Province, the company is ushering in a ...

We develop, own, and operate over 2GW of renewable energy through our renewable energy subsidiary Pele Green Energy, and we provide research-led development in the environment of our power plants through Knowledge Pele. PEG owns both subsidiaries 100%. Pele Energy Group was founded with the intention to drive large-scale structural change.

Since 2005, GENESIS ENERGY GROUP has been developing and financing clean energy projects with a capacity of up to 3GW across Africa to date. Our dream is to provide lighting for children to do their homework, provide power for entrepreneurs to run their operations and ensure that governments have the energy to drive their nations forward.

The PNE Group and S.E.T. Select Energy GmbH (SET) want to jointly produce synthetic fuels from renewable energies (e-fuels) in South Africa and market it. The two companies signed a ...

GuarantCo and BII Unlock \$500M Renewable Energy for South Africa. GuarantCo and British International Investment (BII) are driving South Africa's renewable energy transition. Their \$100 million investment aims to unlock \$500 million in new renewable energy projects. This groundbreaking deal,...

KTE is a transformative Green Hydrogen project in South Africa, which integrates massive electrolysis and renewable energy capacities across an expansive site, prioritizing sustainability and socio-environmental impact while aiming to offer competitively low energy costs to ...
