Should South Africa switch to solar energy?

With energy generation currently dominated by coal, South Africa needs to catch up, especially with renewable energy alternatives being cheaper and more accessible than ever before. To this day, Soly has helped 30 000 people make the switch to Solar energy. Your time is now.

What types of generators does Generac offer?

Generac offers a range of generators, including diesel generators from 5kVA to 1100kVA for home, office, and industrial use. They also provide LPG and Natural Gas (NG) generators with classes leading performance. Generac stocks single & three phase air-cooled generators from 8 to 20 kVA, which are ideal for domestic use.

Are solar generators a good idea?

Solar generators are also a practical way for you to reduce your carbon footprint, as they use 100% renewable green energy that produces no CO2 emissions. What are the major differences between a solar generator and a gas generator? Gas generators operate on fuel, are loud, can't be used indoors, and require ongoing maintenance.

Solar panels have become a common sight in South Africa, propped up on the roofs of buildings from all sectors of society. Private homes, office blocks, commercial centres, and other properties are increasingly making use of solar backup power. While quite a large initial investment, solar power has proven to be an effective backup power ...
