SOLA delivers clean energy to businesses across South Africa using cutting edge generation and energy storage technologies. We help our clients to grow and prosper through the adoption of low cost and reliable renewable energy.

OverviewEnergy providersPolicies & regulationsTypes of energyFuture researchSee alsoThe South African energy sector is dominated by the company Eskom. Eskom currently produces 95% of South Africa's electricity. Due to their large presence in the non-renewable energy sector, there are independent power producers (IPP) who are capable of providing renewable energy sources. To reach the 10,000 GWh renewable energy target, the government has joined agencies and implemented policies that promote independent renewable energy producers. BioTherm Energy
