

South Georgia and South Sandwich Islands install solar panels on roof

How do I choose a solar company in Georgia?

Solar companies that are licensed, insured and hold certifications take their business seriously. Look for companies that have NABCEP Certified professionals or certified electricians on staff and are properly insured, so their workers, and you, are protected. In Georgia, a solar installer must be associated with a licensed electrical contractor.

Do you need a license to install solar panels in Georgia?

In Georgia, a solar installer must be associated with a licensed electrical contractor. You can find out if an electrical contractor has the required license at the Georgia Secretary of State's website. Financing options Not everyone has thousands of dollars to spend on a solar panel installation.

How much does a 6 kW solar system cost in Georgia?

A 6 kW solar system will cost about \$13,980 in Georgia before incentives. After the 30% federal solar tax credit, this drops to \$9,786, or about \$1.63 per watt. The total cost of a solar system will vary depending on the company you choose, the size of the system, the equipment installed and how you finance it.

Are solar incentives a good idea in Georgia?

Solar incentives and rebates can cut the cost of installing solar in Georgia by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage.

While there are several metal roof types, the most common in Georgia are standing seam and corrugated, both of which can accommodate solar panels. Standing seam roofs are particularly adaptable for solar due to a special device called an S-5 clamp.

The ideal angle for solar panels is influenced by factors like roof shape, weather, and geographical location. South-facing is the optimal direction for solar panels in the Northern Hemisphere, including Georgia. Even if your roof doesn't face south, alternatives like ground-mounted panels can be viable.
