

Kiritimati Island, the world's largest coral atoll and a key development hub for Kiribati with a rapidly growing population (currently roughly 8,000 people), has a dilapidated electricity micro-grid ...

The resulting Kiribati Integrated Energy Roadmap (KIER) highlights key challenges and presents solutions to make Kiribati's entire energy sector cleaner and more cost effective. As a small, remote island state, Kiribati is highly dependent on imported energy supply.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

Kiritimati Island, the world's largest coral atoll and a key development hub for Kiribati with a rapidly growing population (currently roughly 8,000 people), has a dilapidated electricity micro-grid plagued by blackouts/brownouts and extending to only 40 percent of the island's population.

A state-of-the-art fully equipped training hub providing tailored courses to the demands of the fast-evolving renewable energy industry. With immersive practical programs blending theory with hands-on training (20/80).

**Comprehensive Curriculum:** Explore a wide range of topics including EV technology, battery systems, charging infrastructure, and the environmental impact of e-mobility. **Hands-On Training:** Engage in practical sessions, including simulations, case studies, and real-world projects, to apply theoretical knowledge. **Expert Instructors:** Learn from industry experts with extensive ...
