

How can Sri Lanka achieve net-zero achievement?

Country's net-zero achievement requires policy to action transitions at a state level. Sri Lanka as a country has tremendous potential for harnessing energy from renewable sources such as solar, wind, and hydro. However, as of 2018, only 39 % of Sri Lanka's energy generation capacity was harnessed through renewable energy sources.

Does Sri Lanka use wind power?

Sri Lanka's history of using wind power dates back to the 3rd century B.C. and as showcased in Fig. 2 the country currently boasts over 5000 km² of windy areas that are considered to have excellent wind resource potential areas (Sri Lanka Sustainable Energy Authority Ministry of Power and Energy, 2019).

How much energy does Sri Lanka generate?

Until the late 90s, hydropower acted as the country's key energy generator producing nearly the entirety of Sri Lanka's energy requirement. Over the past decade, hydroelectricity has continued to generate between 3.5 to 7 TWh of energy whilst remaining one of the top three energy-generating sources in the country.

What are Sri Lanka's energy policies & strategies?

Sri Lanka's energy policies and strategies strongly focus on developing conventional and nonconventional renewable energy sources for generating power. Promoting domestic energy resources has become one of the main policy components in Sri Lanka.

Is biomass a source of energy in Sri Lanka?

Biomass is primarily used to satisfy domestic energy needs in local households with 69 % of Sri Lankans using it to fulfill their cooking energy requirements (Musafer, 2020). Despite the continued usage of biomass in the country, limited attention has been given to developing it as a formal source of energy.

What percentage of Sri Lanka's energy source is renewable?

However, as of 2018, only 39 % of Sri Lanka's energy generation capacity was harnessed through renewable energy sources. The continuous increase in electrical energy demand and the drastic increase in vehicle population over the past few years have resulted in much of its annual income being spent on purchasing fossil fuels from foreign countries.

The Hayleys Group is a leading diversified conglomerate in Sri Lanka, and one of the country's largest value-added exporters. Hayleys accounts for approximately 5% of Sri Lanka's export income, 4.6% of its tea and 4.1% of its rubber production, with business interests in 16 diverse sectors, catering to over 80 markets worldwide.
