

Does Hayleys solar install solar panels in Sri Lanka?

Hayleys Solar has the capacity to provide an end-to-end, in-house solution for a solar system with a HT interconnection. Here's how we carry out our solar panel installations in Sri Lanka, step by step: What to consider when installing a solar power panel at your home? Solar panel installation in Sri Lanka by Hayleys Solar.

How does a solar system work in Sri Lanka?

Solar Panels: These are the most visible components of a solar system. Solar panels convert sunlight into direct current (DC) electricity. The efficiency of these panels can vary, but in Sri Lanka, with its average solar irradiation of around 4.5 to 5.5 sun hours per day, solar panels can generate significant amounts of electricity.

Are residential solar systems a viable solution in Sri Lanka?

As energy costs continue to rise and concerns about environmental sustainability grow, many homeowners in Sri Lanka consider residential solar systems as a viable solution. A well-designed solar power system can significantly reduce electricity bills, contribute to environmental sustainability, and even provide a backup power source during outages.

How to install rooftop solar in Sri Lanka?

A large number of service providers exist in Sri Lanka contracting the installation of Rooftop Solar. They must register at the Sri Lanka Sustainable Energy Authority (SLSEA). Therefore, it is important to select an institution that is registered with SLSEA which they publish a list of registered service providers in SLEA website.

Why should you choose a residential solar system in Sri Lanka?

Adopting a residential solar system in Sri Lanka can lead to substantial savings on electricity bills, enhance energy security, and contribute to environmental sustainability. Whether opting for an on-grid, off-grid, or hybrid system, working with certified professionals is crucial to ensure a properly designed and installed system.

How long does a solar installation last in Sri Lanka?

The payback period for industrial solar installations in Sri Lanka typically ranges from 3 to 4 years. Efficient project designs and use of high-quality components contribute to favorable ROI. The upfront costs for a factory-sized solar installation can be significant.

System installation begins with installing solar panels on the roof including solar power optimizers and attaching panels. Our electrical experts will then connect the optimizers to the inverter and to your circuit breaker box which generates electricity to your home or business.

Hayleys Solar, the renewable energy arm of Hayleys Fentons, is one of the most trusted service providers for solar power in Sri Lanka, specialising in renewable energy and energy storage solutions for domestic, commercial and industrial requirements.

Hayleys Solar, the renewable energy arm of Hayleys Fentons, is one of the most trusted service providers for solar power in Sri Lanka, specialising in renewable energy and energy storage solutions for domestic, ...

Mounting System Installation: Install the mounting structure according to the design specifications. Ensure proper spacing and alignment of solar panels. **Electrical Wiring:** Connect solar panels in series or parallel to achieve the desired voltage and current. Install conduit and wiring to connect the solar panels to the inverter and electrical ...

To set up a residential solar system in Sri Lanka, several steps and requirements need to be met: **Three-Phase Electricity Connection:** A three-phase connection is necessary for a solar installation. Most households already have this, but confirming with the Ceylon Electricity Board (CEB) is essential.

Typically it will take 1 to 3 days for a residential solar system, depend on the system size. Our team of engineering experts will install solar system & we will also facilitate the documentation with CEB or LECO to make the entire ...

For instance, if your monthly bill is around 200 KWh per month, installing a solar PV with a capacity of 2kW will be sufficient. A system with a 2kW capacity costs around LKR 500,000. If your monthly usage is less than 200 units, it will take a long time to recover your settlement.

Typically it will take 1 to 3 days for a residential solar system, depend on the system size. Our team of engineering experts will install solar system & we will also facilitate the documentation with CEB or LECO to make the entire installation process a hassle-free.
