Basseterre, St. Kitts - The new 18-megawatt dual fuel generators that will be purchased and installed at the Needsmust Power Plant in St. Kitts will significantly enhance the power generation capacity of the facility, while meeting the government's commitment of transitioning to a sustainable island state.

The St. Kitts and Nevis government has commissioned a six-megawatt (MW) rental power plant to stabilize the national grid temporarily while the sole electricity provider undertakes essential infrastructure upgrades.

The situation is made further vulnerable because, of the 27.8 MW capacity SKELEC had in August 2022, 3.4 MW of the power was being supplied by containerized standby generators that are not designed to be running 24 hours a day and for extended periods.

Basseterre, St. Kitts, April 25, 2024 (SKNIS): The new 18-megawatt dual fuel generators that will be purchased and installed at the Needsmust Power Plant in St. Kitts will significantly enhance the power generation capacity of the facility, while meeting the government's commitment of transitioning to a sustainable island state.

Saint Kitts and Nevis Containerized Solar Generators Market is expected to grow during 2023-2029 Saint Kitts and Nevis Containerized Solar Generators Market (2024-2030) | Industry, ...

By Monique WashingtonThe 2.5 megawatts containerized generator at the Nevis Electricity Company power plant in Prospect has been placed on its new pad and is gearing up to be commissioned in the next couple of weeks.Officials said the generator will not be used continuously.The Manager at NEVLEC Jervern Swanston told the Observer Thursday that the ...

Nevlec lost \$1.3 million using old generator By Monique Washington The Nevis Electricity Company Ltd (Nevlec) will now have some financial relief with the commission of a new containerized generator this week after losing over \$1.3 million in the last two years from the three decade old generators periodically going offline. The revelation was made this [...]
