

Why is electricity expensive in Kosovo?

Usually, in Kosovo the imported energy is much more expensive than export. This is because Kosovo imports energy one day before needed, in the other hand energy is exported during the night when the demands are under generating level. Imports and exports have a negative impact for electrical energy price.

What is the energy strategy for Kosovo?

The Kosovo energy strategy includes increasing RES capacity to 35% of electricity consumption by 2031. Aiming for 600 MW wind, 600 MW solar PV, 20 MW biomass & at least 100 MW of prosumer capacity, to reach a total installed RES capacity of 1600 MW by 2031. Lignite exploitation in Kosovo started in 1922.

Which companies are affecting the energy sector in Kosovo?

Besides government institutions, there are also companies with great impact in energy sector such as Kosovo Energy Corporation ( KEK ), Transmission, System and Market Operator ( KOSTT) and Kosovo Electricity Distribution and Supply (KEDS). A lot of legislative documents that aim the adjustment of electricity sector have been approved.

How inherited issues have affected the energy sector in Kosovo?

The inherited issues after the war in Kosovo and the transition period have had an immense effect on the progress of this sector. Regulation of activities in energy sector in Kosovo is a responsibility of the Energy Regulatory Office (ERO).

Who is Kosovo Energy Distribution & Supply Company (KEDS)?

Kosovo Energy Distribution and Supply Company (KEDS) is a company operating throughout Kosovo having the exclusivity for electricity supply and distribution in the territory of Kosovo. Since May 2013, Kosovo Energy Distribution and Supply split from Kosovo Energy Cooperation and started its operational activities as a joint stock company.

Who produces electricity in Kosovo?

A few private firms also produce electricity (wind-based, run-of-the-river hydro-electric, and solar). Transmission and operation are performed by Kosovo's Transmission System and Market Operator (KOSTT, a POE), a member of ENTSO-E (the European Network of Transmission System Operators for Electricity).

Kosovo's recent Energy Strategy sets an ambitious vision to achieving a just energy transition for the country between 2022-2031. The main pillar of the Strategy is to accelerate renewable deployment, focused on utility-scale wind and solar PV. Kosovo plans to integrate 1200 MW of RES over the next 10-years. 100 MW Solar Engineering, P ...

The strategy's approach balances energy security and affordability of electricity supply for customers while ensuring Kosovo's long-term commitment to decarbonization. Addressing climate change is a top priority for Kosovo as part of the government's renewed and strengthened commitment to building climate resilience.

The Assembly of Kosovo approved the Energy Strategy of the Republic of Kosovo 2022-2031 on 8 March 2023. You can find the Strategy at the following link: [https://me.rks-gov /en/energy-2/](https://me.rks-gov/en/energy-2/) Latest news

The Assembly of Kosovo approved the Energy Strategy of the Republic of Kosovo 2022-2031 on 8 March 2023. You can find the Strategy at the following link: [https://me.rks-gov /en/energy-2/](https://me.rks-gov/en/energy-2/)

Until 2020, Kosovo promoted renewable energy in the electricity sector using a feed-in tariff, which was suspended by the ERO due to the cost-inefficiency of competitive support mechanisms. Kosovo is now developing a legal framework to introduce more effective and transparent schemes, like auctions, to advance renewable energy growth. [6]

The Energy Strategy of the Republic of Kosovo 2022-2031 is a basic document which defines the main directions and actions for the development of the energy sector over the next 10 years. The Energy Strategy reflects the need for rapid and convincing developments in the energy sector, as envisaged in Kosovo's vision and in line with EU goals.
