

Does Armenia have solar energy?

Armenia also has notable solar energy potential. The average annual amount of solar energy flow per square meter of horizontal surface is approximately 1,720 kilowatt-hours (kWh), which is high relative to an average European figure of 1,000 kWh.

Where does Armenia get its energy from?

Lacking indigenous resources, Armenia imports natural gas and oil for most of its energy needs (78.6% of total energy supply in 2020), mainly from the Russian Federation (hereafter, "Russia").

Why does Armenia need a single energy supplier?

Armenia relies on imports of natural gas and oil for most of its energy needs, which exposes it to supply risks and dependence on a single supplier. As the government considers energy security and the development of indigenous sources to be of prime importance for the energy sector, renewables and efficiency measures are key areas.

Does Armenia have a surplus electricity sector?

The Armenian electrical energy sector has had a surplus capacity ever since emerging from a severe post-Soviet crisis in the mid-1990s, thanks to the reopening of the Metsamor Nuclear Power Plant, which was built in 1979 and supplies over 40% of the country's electricity.

How much energy does Armenia import?

Oil fuels need to be imported. Natural gas represents the largest - 76.3% share of Armenia's energy imports (2.45 mln toe), followed by oil products 22.6% (0.73 mln toe). Armenia exports electricity in 2022, of which by 0.79 nuclear power plant (31.0%), natural gas fired thermal power plants (42.2%), hydro power plants (21.1%) and wind and

What are the issues affecting energy supply in Armenia?

However, issues related to energy supply, electricity market liberalization, and administration remain. Armenia has limited energy resources and can meet only a fraction of the total demand for energy from domestic resources. Armenia does not have oil or natural gas reserves and is thus highly dependent on imported energy resources.

Overview History and geopolitics Rankings Primary energy supply Natural reserves Oil Natural gas See also Energy in Armenia is mostly from natural gas. Armenia has no proven reserves of oil or natural gas and

currently imports most of its gas from Russia. The Iran-Armenia Natural Gas Pipeline has the capacity to equal imports from Russia. Despite a lack of fossil fuel, there are significant domestic resources to generate electricity in Armenia. The Armenian electrical energy sector has had a surplus...

This was the first major international debt-financing package in Armenia's power sector. The Vorotan complex is one of the country's main power-generating facilities, providing 12 percent of Armenia's electricity generation. That initiative led to additional private investment in the country's energy sector.

Surrounded by countries with significant hydrocarbon stores, Armenia's own fossil fuel reserves are limited to a small number of lignite or brown coal mines. Some oil reserves exist, but they are too deep to be economically viable. As a result, electricity generation depends on imported nuclear fuel (44%) for the country's Metsamor nuclear plant, due for ...
