

Does solar energy have potential in Sudan?

According to the study, solar energy has a huge potential in Sudan for contributing to the energy sector and development of the country. However, this potential is being challenged by the country's lack of incentives and current policies.

Is solar energy making a comeback in Sudan?

Fortunately, the country is now witnessing a comeback to solar energy as it is an effective tool to drive development, employment, and stability - particularly in rural and agriculture-focused communities. "In Sudan, access to energy is a critical tool, and solar is an effective way to achieve this.

What should Sudan's government do about solar energy?

Mr. Afanasiev advised the Sudan's government to continue its current direction of expansion of renewable energy solutions and continue efforts to make solar technology as accessible as possible. The cost should be reduced by tax and duty exemptions.

How can solar power help refugees in Sudan?

In Eastern Sudan's refugee camps and surrounding local communities, solar cookers are being provided by the agency to reduce cutting of local forests for firewood, solar streetlights installed to improve security, and small panels distributed to allow cellphone charging. These are all practical solutions that can be deployed in most areas in Sudan.

Can solar power irrigation pumps in Sudan?

Solar panels power irrigation pumps on a farm in Northern State (UNDP Sudan/Muhanad Sameer) KHARTOUM (Sudan) - Sudan was one of the first nations to understand the importance of renewable energy. In this bid, the country took good steps in early 1980s for the development of rural areas via the technologies of solar and wind energies.

Will Sudan be able to deploy solar power in Africa?

If implemented, these projects would represent the country's first attempt to deploy utility scale PV capacity. Sudan has one of the lowest levels of solar development in Africa although it has one of the best levels of solar radiation in the whole continent.
