

How do solar panels work in Luxembourg?

In Luxembourg, the main model is that of self-consumption with sale of surplus. To put it plainly: owners of solar panels consume the energy produced by their panels directly. If there is any electricity left over, it is sold back to the grid at a rate set by the government. This system has a number of advantages:

How much energy does a solar PV system produce in Luxembourg?

Average 2.60kWh/day in Autumn. Average 1.22kWh/day in Winter. Average 4.63kWh/day in Spring. To maximize your solar PV system's energy output in Luxembourg, Luxembourg (Lat/Long 49.6113, 6.1294) throughout the year, you should tilt your panels at an angle of 42°; South for fixed panel installations.

Is Luxembourg a good place to install solar panels?

Luxembourg ranks 72nd in the world for cumulative solar PV capacity, with 209 total MW's of solar PV installed. Each year Luxembourg is generating 330 Watts from solar PV per capita (Luxembourg ranks 10th in the world for solar PV Watts generated per capita). [source]

How can Luxembourg encourage the adoption of solar energy?

To encourage the adoption of solar energy, the Luxembourg government has set up a range of grants and subsidies that make the installation of solar panels even more attractive. The programme Klimabonus offers to reimburse up to 62.5% of the cost of the photovoltaic installation for self-consumption contracts.

Are there incentives to install solar energy in Luxembourg?

Yes, there are several incentives for businesses wanting to install solar energy in Luxembourg. The government offers a range of financial support measures, including grants and tax credits, as well as access to low-interest loans.
