

Thanks to the high level of solar radiation in Madagascar, the solar system can ensure the average power requirement of at least 20,000 Madagascans and avoid the emission of around 4,000 tons of CO₂. That is about the same amount as 2,000 German petrol cars emit every year.

Madagascar is one of the sunniest countries in the world with more than 3,000 hours of sunshine per year, so decentralised solar power supply to rural areas is not only easier but also cheaper. atmosfair finances the construction and operation of decentralised solar power grids ("solar mini-grids") in the southwest of the island

Notre sélection de panneaux solaires ; Madagascar est conçue pour optimiser vos besoins énergétiques de manière durable et rentable. Grâce ; notre expertise et ; un service client ...

By 2023, UNICEF Madagascar achieved a milestone by powering its six zone offices entirely with sustainable energy sourced from solar systems. This transition has not only ensured high energy availability in offices that previously experienced frequent power outages but has also significantly reduced the offices' carbon footprint, aligning ...

At a near-by school, UNICEF collaborated with the Government and the private sector to install a solar-powered water desalination system to provide potable water to the integrated health centre,...

With all regions of Madagascar enjoying over 2,800 hours of sunlight per year, the Grande Ile is the perfect location for development of solar power, with a potential capacity of 2,000 kWh/m²/year. The Government is counting on this potential to fulfill its objective of providing energy access to 70% of Malagasy households by 2030.

Three large-scale heavy fuel oil (HFO) plants in Madagascar are being hybridised with solar PV thanks to a USD 6 million bridge loan from REPP to developer Lidera Green Power (Lidera). Currently, 75% of the country's power is generated from expensive and high-emission HFO and diesel plants, but the government is keen to reduce dependence on ...

Operators of the largest solar power station in the Indian Ocean have launched a new solar PV plant in the north of Madagascar. NEA Sava, a joint venture between Axian Group and GreenYellow, has put the power plant in Antalaha into service.
