

Can solar power improve agriculture in Kenya?

With the tremendous solar potential in Kenya and the maturity of PV and electric pump technology, the agricultural sector, including smallholder-level farms, is an ideal candidate for rapid growth, improving crop yields, productivity and farmer income while avoiding massive amounts of GHG Emissions.

What does Sunculture do?

SunCulture is presenting a total value-chain solution that incorporates a technical product (pump and drip irrigation system) together with a comprehensive service offer including crop analysis, advisory, finance and technical support.

How is Sunculture leveraging demand for solar powered irrigation?

On the demand side, SunCulture is utilising several strategies to uncover and cultivate existing demand for solar powered irrigation, leveraging new media opportunities together with success stories from early adopters and the reach of a high profile local partner in East Africa's largest microfinance-focused bank.

Can Sunculture jump start a market for clean irrigable land?

SunCulture's offer has the potential to jump start a market for clean irrigation that can grow to encompass the entirety of Kenya's irrigable land.

Explore SunCulture's range of solar-powered irrigation pumps, including solar irrigation pumps, solar water pumps, and efficient solar pumps designed to boost farm productivity. Discover sustainable, eco-friendly irrigation solutions for farms of all sizes.

Discover our range of solar water pump irrigation products, including the ClimateSmart Battery with RainMaker 2 System, designed to boost crop yields and conserve water. Enjoy flexible payment plans, free delivery, installation, and ongoing support. Transform your farming with SunCulture today.

Kenya's SunCulture, a provider of solar-powered irrigation solutions and agricultural technology to smallholder farmers, has raised a US\$27.5 million Series B funding round to fuel its growth and build new products. SunCulture helps smallholder farmers grow more food with climate technology, financing, and a digital marketplace. The company ...

SunCulture, a leader in solar irrigation systems, recently obtained significant funding, propelling its mission to innovate agriculture amidst the growing food crisis in Africa. The financial boost comes from Nithio Financial Intermediary, renowned for backing renewable energy initiatives through AI-driven strategies.
