

What is the Sunny Home Manager 2.0?

The Sunny Home Manager 2.0 monitors all energy flows in the home, automatically identifies potential savings and facilitates efficient use of solar energy. Intelligent energy management is thus becoming even easier and more cost-effective. Your Benefits Intelligent energy management and power measurement in a single device

What's new in sunny home manager?

New hardware: Sunny Home Manager 2.0 (HM-20) Successor of Sunny Home Manager Bluetooth (HM-BT-10). Two products in One: Incorporates an integrated energy meter up to 63 A (> 63 A via current transformers), Standard application: Power measurement at grid connection point (grid supply/ feed-in), no additional SMA Energy Meter required

Is sunny home manager better than SMA energy meter?

As the firmware for intelligent energy management offers the user considerable savings and, naturally, it costs money to develop and maintain the software, the Sunny Home Manager 2.0 combined device is slightly more expensive than the SMA Energy Meter.

How does sunny home manager work?

Enable: Sunny Home Manager controls charging and discharging of the Sunny Island battery in order to optimize excess energy usage for PV plant with dynamic output power limitation (i.e. 70% rule for Germany)
Disabled: Sunny Island applies its internal control algorithms according to the measured condition at the grid connection point.

Why should you choose a sunny home manager?

This increases the self-consumption rate of the solar power and enables optimal use of new dynamic tariffs - all fully automatically and cost-effectively. The Sunny Home Manager 2.0 has established itself as a market bestseller, with over 300,000 installations and more than a decade of success.

Does sunny home manager support SMA battery inverters?

Support of PV systems using SMA battery inverters including a battery-backup function and grid feed-in limitation at the grid-connection point of 0% (zero export). In the Sunny Home Manager device properties, it is possible to set a display filter for easy and extended configuration. Version 2.03.5.R (January 2020)
Performance features:

The Sunny Home Manager 2.0 combines all energy flows in your home to create an intelligent system and, upon request, can control them automatically to help you get the most out of your solar power. On the basis of an online weather forecast and your own consumption analysis, the system creates a day-by-day yield forecast.

The Sunny Home Manager 2.0 is SMA's intelligent energy manager and enables the most efficient use of solar energy in the home. It optimizes PV self-consumption and significantly reduces electricity costs.

Sunny Home Manager 2.0 uzrauga visas energijas plusmas majas, automatiski identificē iespējamās ietaupījumus un veicina efektīvu saules energijas izmantošanu. Tas padara viedo energijas pārvaldību vēl vienkāršāku un rentablāku, apvienojot viedās majas pārvaldības un SMA energijas meritāžas funkcijas viena ierīcē.

SMA Sunny Home Manager 2.0 - Steuergerätes f#252;r intelligentes Energiemanagement mit integrierter Leistungs-Messeinrichtung (1-3 phasig, bidirektional), Anschluss an das lokale Netzwerk via Ethernet

With the Sunny Home Manager 2.0 you can have your very own solar charging station right on your doorstep. E-mobility is truly sustainable only when the charging current comes from renewable energy sources - ideally from the PV system on your own roof.

Together with the SMA PV inverter and connected loads, the Sunny Home Manager 2.0 ensures a long-term energy supply and provides you with independence from rising electricity costs. Whether washing the dishes, doing the laundry in an eco-friendly way or heating and charging the e-car with solar power - we show you all electrical and thermal ...

El Sunny Home Manager 2.0 asegura siempre el espacio necesario en la bater#237;a. En lugar de cargar la bater#237;a por la ma#241;ana con corriente fotovoltaica sobrante, el Sunny Home Manager 2.0 controla el inversor con bater#237;a de tal forma que la bater#237;a pueda cargarse con la mayor energ#237;a

fotovoltaica limitada posible del pico del día.

Just like the term Web 2.0, the extension 2.0 does not describe a radically new type of technology or application. Instead, it describes the modified and extended use of the product. Here, you can learn why the Sunny Home Manager now looks like the SMA Energy Meter and what this means for the PV system. Why is there a new Sunny Home Manager?

W tym celu Sunny Home Manager 2.0 zawsze zapewnia wystarczajacäa pojemnosc akumulatora. Zamiast ladowac akumulator nadwyzka energii z PV, Sunny Home Manager 2.0 steruje falownikiem bateryjnym w taki sposób, aby jak najwiecej energii z PV wyprodukowanej w poludniowym szczycie trafilo do akumulatora.

[Update vom 3.9.2020 | Download: Neue kompatible Verbraucher] Mit dem Sunny Home Manager 2.0 ist intelligentes Energiemanagement im Privathaushalt ganz einfach. Gemeinsam mit dem SMA Solar-Wechselrichter und den angeschlossenen Verbrauchern sorgt der Sunny Home Manager für eine nachhaltige Energieversorgung und macht unabhängig von steigenden Kosten.
