

What is a Super B lithium battery?

Super B lithium batteries offer huge energy reserves, weigh substantially less, are easy to install and will last considerably longer than other batteries. Super B's Lithium Iron Phosphate batteries (LiFePO<sub>4</sub>) are designed to be the safest and most energy-efficient battery available in the marine industry.

Where are Super B lithium batteries made?

We deliver the necessary power to our employees, partners and customers to be in charge. All our Super B lithium batteries are engineered and manufactured in our factory in Hengelo, the Netherlands. This allows us to offer advanced testing and assures we fulfil the high Dutch quality standards. Super B is 100% dedicated to quality. It's in our DNA.

Which cars use Super B lithium batteries?

Powered by Super B lithium batteries. Aston Martin Racing claim 24H of Le Mans victory using Super B lithium batteries. Lotus chooses Super B as standard OEM fitment for most of their cars. Red Bull KTM Factory Racing Team's Sam Sunderland takes overall win in Abu Dhabi Desert Challenge using Super B lithium batteries.

Who makes a lithium battery for a motorhome?

KABE AB: Swedish manufacturer of caravans and motorhomes chooses Super B as their lithium battery supplier. Launch of the new Epsilon 12V100Ah. Super B is the exclusive supplier of lithium batteries for Hobby. Launch of the new Nomia 12V340Ah lithium energy battery. A Koolen Industries Company. Enable the energy transition

Which lithium iron phosphate battery has the highest capacity?

The Epsilon 12V150Ah Lithium Iron Phosphate battery has the highest capacity in a standard casing available on the market. The highly sophisticated and integrated BMS brings safety, functionality, and ease of use together in a lightweight and robust casing.

What makes a good lithium battery?

To produce the safest and most reliable lithium battery we take great care of the materials and construction of our batteries. Lithium Iron Phosphate is used for all of our lithium batteries, which is the safest and most reliable type of lithium chemistry available today.

Les batteries au lithium de Super B sont légères, sans entretien, se rechargent rapidement et durent longtemps. Les batteries lithium fer phosphate (LiFePO<sub>4</sub>) de SuperB fournissent une puissance extrêmement fiable et la tranquillité d'esprit qui vous permettra de profiter pleinement de votre voyage.

Discover the seamless integration of Super B lithium batteries with Victron Energy systems. Monitor, manage, and optimize your energy setup remotely. Super B and Victron provide scalable, high-performance solutions for reliable power anywhere, ...

Super B lithium batteries are suitable for leisure marine applications. The lithium iron phosphate (LiFePO<sub>4</sub>) batteries are built to last for a longer period of time and engineered to be extremely safe. Our batteries charge fast and discharge slowly. They hold their charged capacity far longer than lead-acid batteries.

The Epsilon 12V150Ah Lithium Iron Phosphate battery has the highest capacity in a standard casing available on the market. The highly sophisticated and integrated BMS brings safety, functionality, and ease of use together in a lightweight and robust casing.

The use of lithium batteries in race cars is increasing rapidly. Old-school lead-acid batteries are being replaced by lithium power batteries to improve performance. ... Superb safety While Lithium Iron Phosphate has helped reduce the weight of automotive batteries, it has also helped bolster safety. Safety is extremely important and therefore ...

Lithium batteries for commercial marine . Every day millions of passengers, goods and materials are being transported on the oceans and inland waters. Companies are looking to reduce their energy consumption and governments are closing the boundaries for CO<sub>2</sub> emissions.

Super B lightweight Lithium Ion batteries are designed to replace the much heavier lead/acid batteries. Super B Lithium batteries are based on Lithium Iron Phosphate technology and is the safest Lithium Ion technology available.

The Epsilon 12V150Ah Lithium Iron Phosphate battery has the highest capacity in a standard casing available on the market. The highly sophisticated and integrated BMS brings safety, functionality, and ease of use together in a ...

Our lithium batteries are being used across the globe to serve as a reliable and safe power source. When you work at Super B you will experience powerful job opportunities too. From implementing intelligent software solutions for the battery to working on the design and mechanical aspects of the battery. And from building the actual battery to ...

Since 2007, Super B develops and produces high-end lithium iron phosphate (LFP) batteries for a number of applications, ranging from motorcycles & recreational vehicles to commercial vessels & industrial markets.

Lithium accu's voor boten Super B's lithium-ijzerfosfaat accu's zijn speciaal ontwikkeld met het oog op maximale veiligheid en energie efficiëntie. Onze lithium accu's bevinden zich in het topsegment van de maritieme sector. De accu's zijn afgestemd op de unieke eisen van hybride aandrijving en boordnet.

Super B lithium batteries are a reliable and safe power source to start your motorcycle. At 1/3 the weight of lead-acid motorcycle batteries, Super B's lithium batteries features high discharge currents in a compact and lightweight casing. The high discharge rates start engines with ease, making them the perfect choice for any motorcycle.

We zijn erg blij dat dit bedrijf ons hier in hebben geholpen en met een professioneel oog er naar hebben gekeken. Zo is het ons samen met Super B Lithium Batteries toch gelukt om de pakketten te kunnen op sturen. :-)? @superbbatteries".

Batteries au lithium . Super B dispose d'une large palette de batteries au Lithium Fer Phosphate (LiFePO4). De la petite batterie puissance de haute qualit  pour les motos et les voitures de course,   la batterie  nergie intelligente dot e d'une grande capacit  pour les v hicules de loisirs, le maritime et les applications industrielles.

La batterie Super B Nomia 12V340Ah est une batterie rechargeable lithium-fer-phosphate (LiFePO4) ayant une capacit  nominale d'au moins 340Ah. Support ... Batteries lithium par rapport au plomb. Camping car Marine Marine de plaisance. Navires commerciaux. Projets. Sport ...

Las bater as de fosfato de hierro y litio (LiFePO4) de gama alta Super B se han desarrollado y fabricado para superar a las bater as de plomo- cido en carretera, en el agua y fuera de la red el ctrica.
