

Through its Strömma offer, the company and its Swedish partner, Svea Solar, will soon begin selling electricity produced exclusively by photovoltaics and wind to all kinds of residential ...

Sweden"s Bright Solar Future: Empowering Tomorrow with Large Scale Solar PV and Storage. Large Scale Solar PV | Energy Storage | Grid Resilience. Building on the success of Solarplaza"s first Sweden-focused event, the 2025 edition promises an even more impactful experience for renewable energy professionals.

Titled STRÖMMA, the scheme will operate as a monthly electricity subscription that allows people to source energy from wind and solar power and use an app to track their electricity usage. In addition, customers who use IKEA solar panels, which are available in 11 countries, will be able to track their own energy production through the app and ...

Takorama Elteknik has received a new order for the logistics property company Catena. The deal includes roofing, solar installation, two energy storage facilities and electrical engineering services at two logistics properties in Borås. The ...

There is huge potential to develop solar parks on the Swedish market, where large spaces can contribute to the energy transition, and where battery technology creates stability in the electricity system. Solar parks call for permits and various kinds of environmental consideration, both for wildlife and when it comes to food production.

Through the STRÖMMA offer in Sweden, customers can buy affordable, certified electricity from solar and wind, and use an app to track their own electricity usage. Customers who have already bought solar panels from IKEA can also track their own production in the app and sell back the electricity they don"t use themselves.
