SOLAR PRO. Syria solar safran electrical and power

Where does solar energy come from in Syria?

The use of solar energy spreads from northwestern Syria, which started relying on solar power around 2016, passing through areas in the north-east, ending with the areas under the control of the Syrian regime, which directed a clear trend to generate electricity through them, not only in large industrial facilities but even in homes.

Why are Syrians using solar panels?

Cut off from the power grid and with fuel costs soaring, Syrians in a poor, embattled enclave have turned en masse to solar panels to charge their phones and light their homes and tents. Solar panels covering rooftops, some of which have been damaged in government attacks, in Binnish, Syria.

Are solar panels a better option than losing electricity in Syria?

According to an opinion poll conducted by Enab Baladi, a number of Syrians residing in various governorates considered that alternative energy through solar panels is a better option than losing electricitydespite its high costs and regardless of the controlling parties.

Who is Safran electrical & power?

It is a key player in the equipment electrification &in the electric and hybrid propulsion sector. Mastering the on-board energy system,the company designs and provides modular,innovative and optimized architectures and solutions. Safran Electrical &Power is a developer of both primary generation systems and auxiliary generation systems.

Are solar panels a viable alternative energy source in Syria?

As an option that seemed to be one of the best alternative energy sources in Syria,reinforced by the absence of fuel, the spread of solar panels began in most regions, respectively, years ago, amid "government" support and adoption of this trend.

Is Syria a good country for solar energy?

Regarding wind energy, which is the second source of energy, Syria is not considered one of the countries that have a sufficient amount of wind throughout the year to produce electricity, and therefore the solar energy situation is regarded as the best in it.

In 2017, solar panels in Syria began to supplant generators as locals" main source of electricity. However, locals did not use solar panels out of ecological concern. People just needed an affordable source of electricity because the fuel to power generators became prohibitively expensive.

Safran Electrical & Power offers complete solutions for the transmission and management of electricity from generators to loads, via primary and secondary distribution systems that incorporate its own range of
