In the case of most residential solar PV systems, a battery bank will not be necessary. It is because most systems are tied into the local utility grid, which consistently supplies electricity with few power outages. In simple words, the local utility works like the solar PV system's battery storage system.

I'm currently looking into buying two or three power banks. Anker has a really good reputation but I'd like to try to avoid power banks by Chinese companies. It's likely hopeless to find one not made in China but are there reputable, good brands that are at least located outside of China even if their products are made there?
