The solar panel itself seems fairly robust, and is based on a glass panel with the silicon cells laminated onto the back with a white plastic film. I'm in the progress of testing the LiFePO4 lithium cell, but it does appear to have the correct dimensions (32700) for a 6Ah cell.

The solar input is 36 volts 100-400 watts, 42 volt open circuit voltage. If I remember Ryobi 40v batteries max out at 300 watts, but do i need to limit current or will the BMS prevent this. I was also hoping when the 120W solar panel on order from Temu shows up I may be able to have it in parallel with the battery any help/advice is appreciated.

Make Temu your one-stop destination for the latest fashion products, cosmetics & more. Free shipping on items shipped from Temu. Free returns within 90 days. Shop on Temu and start saving. Free shipping on all orders. Limited-time offer. Free returns. Up to 90 days* Price adjustment. Within 30 days. Free returns. Up to 90 days*

Apart from solar panels I've also bought connectors (JST-HX), pre configured cabling, USB cables, switches (normal ones, not IT-switches), LED-chips, LED-drivers and other small electric & electronic components from Temu and Aliexpress, it was all standard quality, that stuff is made in China 99% of the cases anyway, so I was more worried about refund/return ...
