

Is Moldova a member of the Energy Community?

Moldova has been a member of the Energy Community since 2010 and signed an Association Agreement with the European Union on 27 June 2014. It therefore had until December 2017 to make its legislation conform to the EU *acquis communautaire*, which

What is Moldova's energy consumption?

Transport sector is the second-largest energy consumer (around 0.7 Mtoe) and the main driver in oil consumption growth. Renewables represent 20% of Moldova's energy mix, consisting almost fully of solid biofuels (19% in 2018). 6% of electricity generation comes from renewable sources (hydro, wind, solar PV).

How has Moldova restructured its electricity distribution network?

As part of the reforms, Moldova restructured and partially privatized its electricity distribution network, including Premier Energy, a private company that controls 70 percent of the country's electric distribution grid.

What is the main energy source in Moldova?

Natural gas accounts for more than half of Moldova's total primary energy supply (53% in 2018), oil roughly a quarter (23% in 2018) and solid biomass one-fifth (19% in 2018). Most natural gas is used for electricity and heat generation,³ whereas oil is the most important energy source for final consumers.

Is energy security a priority for Moldova?

Energy security is a priority for Moldova. International financial institutions, including the World Bank, the European Bank for Reconstruction and Development (EBRD), and the European Investment Bank (EIB) finance many projects strengthening Moldova's energy security.

Does Moldova need a gas pipeline?

Once at full capacity in 2020, the pipeline is expected to supply almost all the gas Moldova consumes, but not that of the Transnistria region. The government also plans to diversify the energy mix with more renewable energy.
