

Does Morocco need a solar power station?

Morocco plans to generate 42% of its energy from renewables by 2020, rising to 52% by 2030, with solar, wind and hydropower each providing a third of the total. The new Ouarzazate Solar Power Station will help Morocco meet its renewable power targets. Image: Solar Business Hub The country is well on its way to achieving that goal.

How many reports has WSRW produced on occupied Western Sahara?

WSRW has produced four reports on the energy industry in occupied Western Sahara, two on renewables and two on oil and gas. Totally Wrong (2013b) focuses on the activities of the Total oil company in occupied Western Sahara.

Could large solar farms in the Sahara Desert redistribute solar power?

Large solar farms in the Sahara Desert could redistribute solar power generation potential locally as well as globally through disturbance of large-scale atmospheric teleconnections, according to simulations with an Earth system model.

Will Morocco include waters beyond Western Sahara?

The paper predicts that Morocco will include waters beyond Western Sahara in its case before the Commission, but that its claim will ultimately be rejected. This article overlaps with the majority of legal studies that find Morocco to be an occupying power.

Is natural resource exploitation a problem in Western Sahara?

As the issue of natural resource exploitation in Western Sahara has been conceptualised in very different ways and from the perspectives of a variety of disciplines, the authors have opted for a semi-systematic review of the work done encompassing academic, non-academic, and activist backgrounds.

Does Morocco export phosphorus from occupied Western Sahara?

P for Plunder: Morocco's Exports of Phosphates from Occupied Western Sahara. Brussels: WSRW. Western Sahara Resource Watch. 2019. P for Plunder: Morocco's Exports of Phosphates from Occupied Western Sahara. Brussels: WSRW Western Sahara Resource Watch. 2020. P for Plunder: Morocco's Exports of Phosphates from Occupied Western Sahara.
