

The Gambian government is looking for partners to further progress of the country's first utility-scale solar park, a proposed 150MW plug-and-play facility set to include a 20MWh battery storage...

On Saturday, at a historic occasion in the Community of Kombo Jambur, President Barrow led the official inauguration ceremony of the now completed 23 Megawatt Solar Plant and an eight Megawatt Battery Energy ...

Why Energy Storage in The Gambia? oThe Government is decided to promote local solar to complement the imports from WAPP and minimize use of HFO oSolar was a good alternative because the resource is abundant and international prices had ...

On 9th of March 2024, with participation of His Excellency the President of the Republic of The Gambia, the Honorable Minister of Petroleum and Energy of the Republic of The Gambia and ...

Gambia's Ministry of Petroleum and Energy and utility National Water and Electricity Company (Nawec) have invited independent power producer (IPP) developers to submit a request for qualification (RFQ) for the first stage of the Soma solar-storage project.

The Gambia has inaugurated a 23 MW solar power facility in Jambur, situated along its western coast. Construction commenced in February, incorporating 8 MWh of battery storage. Upon completion, it is projected to boost the country's energy output by 20%, which caters for approximately 18,500 households.

Recent developments include the commissioning of a 23 MW solar plant capable of producing 23 megawatts of power at any given moment. This installation also features an 8 MWh battery storage system and is part of The Gambia's Electricity Restoration and Modernization Project, which aims to achieve universal electricity access by 2025.

The project, which may be coupled with 20 MWh of storage capacity for grid stabilization purposes, is expected to be built in two phases, with the first, 80 MW unit scheduled for completion in...
