

Who is 2G Energy AG?

The 2G Energy AG Group is an internationally leading manufacturer of decentralized energy supply systems. With the development, production and technical installation as well as digital grid integration of combined heat and power systems (CHPs), the company offers comprehensive solutions in the growth market for highly efficient CHPs.

What is 2G Energy?

2G Energy refers to modular CHP (Combined Heat and Power) cogeneration systems. This site, for instance, uses (2 units) of 2G Energy's avus 1,000b units, each with an output of 1142 kW. They include the 2G Master PLC (MPLC) for load sharing and future control capabilities, for optimum efficiency and resiliency. These systems utilize LNG as fuel, eliminating the need...

How many countries does 2G energy operate in?

The company is active in more than 50 countries and generated net sales of EUR 266 million in the 2021 financial year. 2G was founded in 1995 and has been listed on the stock market since 2007. The shares of 2G Energy (ISIN DE000A0HL8N9) are listed in the "Scale" segment of the Frankfurt Stock Exchange. 31.12.

2G Energy AG is one of the leading international manufacturers of combined heat and power (CHP) plants for decentralized generation and supply of electricity and heat. We invite you to get a comprehensive picture of our company on the following pages.

2G Energy is one of the world's leading manufacturers of combined heat and power generation systems (CHP) providing a decentralised supply of heat and electricity using reciprocating piston engines that run on hydrogen, biomethane, biogas, sewage gas, landfill gas or natural gas.

2G Energy AG is an internationally leading manufacturer of combined and heat and power plants (CHP) for the decentralised provision of power and heat on the basis of gas motors driven by natural gas, biomethane, biogas, sewage gas, landfill gas or hydrogen. The portfolio includes plants with an electrical output of 20 to 2,500 kW.

2G Energy AG is an internationally leading manufacturer of combined heat and power system (CHP) for the decentralised provision of power and heat on the basis of gas motors driven by natural gas, biomethane, biogas, sewage gas, landfill gas or hydrogen.

Technical Team Lead - 2G Energy Ltd | Age Grade Rugby Coach - Peterborough Rugby Club; Driven by my values for exceptional quality. I enjoy maintaining the efficiency and power output of power generation equipment in order to maximise client profitability.

 I'm a calm and committed

person with a positive outlook on life that rubs off on others. Self motivated and ...

While during the time of the IPO, with the original name of "2G Bio-Energietechnik AG", the main focus stayed on the role as manufacturer of biogas cogeneration plants, the strategic position has increasingly changed since then.
