

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

Is Timor-Leste a good country for solar energy?

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.

How long does a solar system last in Timor-Leste?

High electricity costs and readily available solar radiation mean that the average payback period for a rooftop photovoltaic (PV) solar energy system in Timor-Leste is only 1.5 to 3 years instead of the global average of 6-10 years. Transitioning to solar can also help the country meet environmental commitments.

Who bids for solar IPP project in Timor-Leste?

For Timor-Leste, bidders are typically from legacy countries such as Indonesia, Portugal and People's Republic of China. For the Solar IPP project, Government of Timor-Leste represented by the Ministry of Finance has provided backstop guarantee for EDTL obligations under the Implementation Agreement.

What does renew do in Timor-Leste?

From 2003 to 2021, Renew worked with communities in Timor-Leste to provide clean, renewable lighting and electricity. We helped install solar lighting and power to more than 2,000 homes and over 100 community centres, orphanages, schools and hospitals in remote rural villages. We also helped train 180 village-based solar technicians.

Does Timor Leste have a country Factsheet?

Specifically for Timor Leste, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

UNDP's "Solar for All" project in Timor-Leste brings solar energy to remote communities, providing electricity to households, schools, and health centers. This initiative aims to reduce reliance on harmful energy sources and improve rural living standards.

As Timor-Leste moves toward prioritizing more climate-friendly development, clean energy is providing empowerment and opportunity for its people. With solar lights in their homes, women across the country can dream ...

Currently, there is one operational solar farm in Timor-Leste. This is the 300 kWp solar system at the UN House in Dili. 15 The government plans to invest in one utility-scale photovoltaic (PV) solar power plant with a capacity of up to 100 ...

3 ???&#0183; As Timor-Leste moves toward prioritizing more climate-friendly development, clean energy is providing empowerment and opportunity for its people. With solar lights in their homes, women across the country can dream bigger, feel safer, ...

oFor the Solar IPP project, Government of Timor-Leste represented by the Ministry of Finance has provided backstop guarantee for EDTL obligations under the Implementation Agreement. oSpecial Investment Agreement, if concluded could allow the winning bidder a leasing of the Site at a concessional rate and other benefits.

Specifically for Timor Leste, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

East Timor solar project, Timor Leste. In cooperation with our local partner, GSOL Energy technicians have installed a 300kWp on-grid solar PV system, which covers 50% of the annual electricity consumption of the UN House, and is ...

Currently, there is one operational solar farm in Timor-Leste. This is the 300 kWp solar system at the UN House in Dili. 15 The government plans to invest in one utility-scale photovoltaic (PV) solar power plant with a capacity of up to 100 MW capacity in the future. 7

East Timor solar project, Timor Leste. In cooperation with our local partner, GSOL Energy technicians have installed a 300kWp on-grid solar PV system, which covers 50% of the annual electricity consumption of the UN House, and is expected to reduce CO2 emissions by ...

Specifically for Timor Leste, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with ...

From 2003 to 2021, Renew worked with communities in Timor-Leste to provide clean, renewable lighting and electricity. We helped install solar lighting and power to more than 2,000 homes and over 100 community centres, orphanages, schools and hospitals in remote rural villages. We also helped train 180 village-based solar technicians.

Timor-Leste holds a strategic advantage over its neighbours in transitioning to solar rooftops, with potential electricity cost reductions and a recovery period of 2.5 years, lower than regional averages. Timor-Leste's rooftop PV market is just emerging. ...
