

# Top 10 energy storage companies Isle of Man

Can the Isle of Man be a green energy leader?

The Isle of Man has a tremendous opportunity to be a global leader in the green energy transition. We have all seen the impact that climate change is having in nations around the world. From rising sea levels to winter flooding and summer heatwaves, the impacts of climate change are real and happening now.

Is the Isle of man suitable for an offshore wind farm?

Orsted and the Isle of Man Government signed an Agreement for Lease at the end of 2015, giving Orsted the right to investigate an area within the Isle of Man Territorial Seas, approximately 6-12 nautical miles off the east coast of the Island, to determine its suitability for an offshore wind farm.

Could a 4bn offshore wind farm meet Isle of Man's peak energy demands?

Power generated from a 4bn offshore wind farm could meet the Isle of Man's peak energy demands, the company behind the plans has said. Renewable energy firm Orsted is seeking views on the proposals for the project in area off the island's east coast.

Could a subsea power supply benefit Manx?

Orsted is exploring subsea connections that could see between 80 to 100 megawatts supplied directly to the island, Mr Galloway said. But the power would primarily be sold to neighbouring nations, which would benefit the island through increased taxation and rent paid by Orsted to the Manx government, he said.
