In this article, PF Nexus recognises the top 10 energy infrastructure companies in Europe, highlighting their critical contributions to the continent's energy transition. Europe is a leader in renewable energy, with 43% of its electricity consumption coming from renewable sources--significantly higher than the global average of 30%.

This commentary is divided into three parts. The first section looks at the capital structure of energy investments, or how debt and equity are used to finance spending on energy assets and companies. The second examines the entities making investment decisions, from governments and state-owned enterprises to households and private firms.

Recognising some of the most successful businesses in this space, delivering large sums of investment to the cause, we take a look at the top 10 renewable energy companies based in Europe with significant influence on the future of the global energy landscape.

This commentary is divided into three parts. The first section looks at the capital structure of energy investments, or how debt and equity are used to finance spending on energy assets and companies. The second ...
