

Does China's Trina Solar get a dumping margin?

China's Trina Solar received a dumping margin of 77.85% for products it makes in Thailand and 54.46% for those it produces in Vietnam. Solar panels at the background as US President Joe Biden speaks during a visit to Vernon Electric Cooperative in Westby, Wisconsin, US. (Reuters)

Where are Trina Solar panels made?

And Hounen Solar started making modules at a 1-gigawatt factory in South Carolina. As for Trina, the company has long planned to establish a foothold in the U.S. to better serve its American customers. But the cost of making panels in the U.S. was prohibitive, said Steven Zhu, who leads Trina's North American operations. The IRA changed that.

Where do Jinko and Trina Solar Panels come from?

Representatives for Jinko and Trina were not immediately available for comment. Most solar panels installed in the United States are made overseas, and some 80% of imports come from the four nations targeted in the Commerce Department probe.

Did Trina receive unfair subsidies?

The department determined that a number of solar companies operating in Southeast Asia had received unfair subsidies. It levied a 0.14-percent tariff on Trina shipments into the U.S., a minimal amount compared with the 23.06 percent penalty Commerce handed down to other companies.

How much has China spent on solar panels?

Eight companies linked to China have spent more than \$1.2 billion to build 23.6 gigawatts of module capacity since the IRA passed, according to interviews with manufacturers and a review of Energy Department figures by POLITICO's E&E News. About 14.5 gigawatts is already online, accounting for nearly a third of U.S. panel-making capacity.
