A Trojan Energy charger supplies power to your electric car to charge the battery. The charger itself is embedded into the ground and lies flat and flush with the surface of the pavement. We give you a Lance to connect your car to the charger. Simply insert the Lance into the charger and connect your car with a cable to begin a charging session.

TROJAN HUB | PRESERVING STREETS Trojan HUB. Our unique charging technology is designed for scale without ruining the streetscape. Our chargers are installed in clusters of up to 15 to maximise charging opportunities for residents - and they lie flat and flush in the pavement to minimise the impact on streets and people.

Meet the different needs of Data center, Telecom, Energy infrastructure and Golf/UV, AWP, FM and other applications, and provide power and energy storage system integration technology services
