

Already one of the world's largest gas exporters, in order to further develop its remaining gas reserves and resources, Turkmenistan aims to further increase exports both to existing customers and to open up new ...

Haidi's lithium solution for AGV is a comprehensive, self-managed battery system designed to meet the cost, performance, efficiency and durability requirements of the rugged warehouse environment. It includes application-specific cell chemistry, charge/discharge management, and advanced safety features such as thermal, short circuit, over ...

Explore Hamidi Energy's premium gas and oil products. Based in Afghanistan and Central Asia, we offer reliable solutions for your energy needs. Our commitment to quality ensures you receive the best products in the industry.

Hamidi Energy is a premier gas and oil company based in Afghanistan and Central Asia, with headquarters in Kazakhstan, Russia, and Uzbekistan. We specialize in import and export, providing top-quality energy solutions to meet global demands.

Domestic energy production. Energy production includes any fossil fuels drilled and mined, which can be burned to produce electricity or used as fuels, as well as energy produced by nuclear fission and renewable power sources such as hydro, wind and solar PV.

Turkmenistan had a total primary energy supply of 26.75 Mtoe in 2014. [1] Electricity consumption was 14.64 TWh. Most of this primary energy came from fossil fuels. [1] All of the electricity is generated with natural gas.

Already one of the world's largest gas exporters, in order to further develop its remaining gas reserves and resources, Turkmenistan aims to further increase exports both to existing customers and to open up new corridors to international gas markets.

Haidi's unique design makes our prismatic cells thin and light weight. This allows for significant space savings. The rectangular shape of thin prismatic cells offer better layering than cylindrical cells, allowing more flexibility for battery design ...

Notably, in 2021, Haidi became the first company to achieve mass production of 26650 LFP cells with a capacity of 5000mAh (1C/3C), marking a significant milestone in the industry. This achievement underscores Haidi's commitment to delivering high-performance, reliable energy solutions tailored to the evolving needs of its customers.

Haidi's unique design makes our prismatic cells thin and light weight. This allows for significant space savings. The rectangular shape of thin prismatic cells offer better layering than cylindrical cells, allowing more flexibility for battery design engineers.
