Masdar, one of the world's leading renewable energy companies, has signed a joint development agreement (JDA) with Turkmenenergo State Power Corporation of the Ministry of Energy of Turkmenistan (Turkmenenergo), to develop a 100 megawatt (MWac) solar photovoltaic (PV) plant, which will be the company's first project in Turkmenistan.

The country's first power plant operating on renewable energy sources will be built on the territory of the Serdar etrap of the Balkan velayat. due to solar and wind energy, with a total installed capacity of 10 MW.

Wakatek specialized in Solar Power Station, Solar Power Inverter, Charge Controller, Solar Lighting System and other electronic components for renewable energy system. We provide excellent power supply solutions and prioritize customer needs to improve their competitiveness and profitability.

The technical potential of wind power in Turkmenistan is estimated at 10 GW of capacity. This potential remains unexploited as the country has no large-scale wind power projects to date. Together with solar PV, wind power can help the government to achieve its aim of diversifying the power mix and partly transition to renewable energy sources.
