Providenciales, Turks and Caicos Islands (Thursday, June 8, 2023) - FortisTCI will invest \$8 million to install the country's first solar plus battery microgrids to power 30% of the electricity supply on North and Middle Caicos and 91% of the electricity supply on Salt Cay in 2024. The microgrids represent the Company's single largest green energy investment to date.

Providenciales, Turks and Caicos Islands (Thursday, June 8, 2023) - FortisTCI will invest \$8 million to install the country's first solar plus battery microgrids to power 30% of the electricity supply on North and Middle Caicos and 91% of the electricity supply on Salt Cay in 2024. The microgrids represent the Company's single largest green ...

The Turks and Caicos Islands (TCI) is one of the most vulnerable member states of CARICOM. An archipelago of 40 low-lying islands and cays, TCI's geographic location, and small economy make it highly susceptible to climate change impacts such as the increased frequency of hurricanes and sea-level rise (SLR).

Addressing the future of renewable energy in the Turks and Caicos Islands, Fortis revealed ongoing projects aimed at integrating solar energy and battery storage. "We are committed to advancing renewable energy. However, these projects take time and require significant land.
