

Is the next big step for PV Manufacturing in Türkiye?

The company also plans to produce its own wafers in the near future. Elin Energy brand Sirius and Schmid Penkintas are pursuing domestic cell and wafer production ambitions too. Onshoring these key stages in the solar module supply chain looks like the next big step for PV manufacturing in Türkiye.

Will the US be able to make Turkish solar panels?

The company said its plan was to produce 500 MW of gallium-doped monocrystalline passivated emitter, rear contact silicon panels and tunnel oxide passivated contact (TOPCon) panels in 2023, before expanding to 1 GW in 2024. It's clear that the United States has potential for Turkish module manufacturers.

Where is Europe's largest vertically integrated solar module manufacturer based?

Photo: pv magazine/Matthew Lynas Europe's largest vertically integrated module manufacturer is based in Türkiye. The continent's largest solar array, the 1.35 GW Kalyon Karapınar PV power plant, is also found there. This did not happen by accident. It's a pivotal time for solar in Türkiye.

Our goal is to install 100 MW of solar power capacity in Turkey this year and to develop additional potential internationally. TEGNATIA offers high-quality turn-key solutions for medium- and large-scale PV projects and has project references including the construction of more than 300 MW solar capacity in PV projects in various parts of the ...
