What does DOE do for remote and island communities?

WASHINGTON, D.C. -- The U.S. Department of Energy (DOE) today announced it will work with 11 remote and island communities around the United States and provide federal assistance to bolster their energy infrastructure, reduce the risk of outages, and improve their future energy and economic outlook.

Why do remote coastal and island communities face high energy costs?

Due to their geographic isolation, remote coastal and island communities often face high energy costs and vulnerable energy infrastructure due to their increased risk of natural disasters and climate change. Watch this video to learn more about the program.

Do IEA islands need resilient power systems?

Islands need resilient power systems more than ever. Clean energy can deliver - Analysis - IEA Islands need resilient power systems more than ever.

Why do coastal and remote communities face unique energy challenges?

Image by Fred Zietz, NREL Coastal, remote, and island communities face unique energy challenges because of their geographic isolation, which often contributes to issues with energy access, quality, affordability, and reliability.

Why do small islands need a new energy infrastructure?

Islands - including those that make up the group known as Small Island Developing States (SIDS) - also need to upgrade their energy infrastructure so that it is resilient to higher temperatures, more frequent natural disasters and flooding related to rising sea levels.

What are the challenges faced by remote and island communities?

Remote and island communities face several energy challenges, including unreliable power, lack of robust connections to mainstream power grids, and threats from strengthening storms.

With more than 730 million people living on 11 000 permanently inhabited islands across the world, and with the number of natural disasters rising sharply in recent decades, it is crucial to find solutions to these issues and meet the energy needs of island residents in a secure, sustainable and affordable manner. Expanding the deployment of ...

THREE60 Energy is excited to announce the appointment of Scott Roy as its new Renewables Director, a key step in the company's ongoing commitment to a just energy transition and helping customers achieve their Net Zero goals.. With over two decades of experience in the energy industry, including significant work in offshore wind and renewables, ...

The Caribbean Energy Chamber (CEC) is here to help change that. We aim to be the leading voice for the Caribbean's energy sector, uniting stakeholders from renewables, energy, engineering, and related industries as well as end users under one shared vision: to ensure affordable net zero energy security for the Caribbean.

Smart charging technologies like dynamic load balancing, renewable energy integration & generation, battery storage and vehicle-to-grid (V2G) give your energy business new opportunities and new revenue sources. All this is possible with our inhouse smart energy management platform. Your energy, our expertise.

This publication serves as a comprehensive resource for policymakers, researchers, and citizens interested in

the dynamic field of ocean energy, offering firsthand accounts and expert insights into the challenges and opportunities of renewable energy in remote and island settings.

This publication includes 5 interviews exploring the objectives, site selection, technical considerations, socio-economic impacts, environmental considerations, and future prospects of ocean energy projects in islands and remote locations.

Work With Us. Join THREE60 Energy and be part of our innovative team, driving sustainable energy solutions. ... driving sustainable energy solutions. Latest News. Stay informed with our companies latest news and industry insights here. ... execute the production enhancement plan, strategy, and activities during field life cycle. Dynamic ...
