

Will the Virgin Islands reduce fossil fuel use by 60% by 2025?

The Virgin Islands, with support from the U.S. Department of Energy (DOE) and the Office of Energy Efficiency and Renewable Energy (EERE), have set a goal of reducing fossil fuel use by 60% by 2025.

What is the Virgin Islands Energy Office?

The Virgin Islands Energy Office (VIEO) is focused on promoting sustainable energy policies in the Virgin Islands through clean energy production and distribution, energy efficiency, transportation, and energy consumption. It achieves this through outreach, financial incentives, training, and technical assistance.

How much of the US Virgin Islands' electricity is generated by solar?

In 2020, about 20% of the US Virgin Islands' electricity was generated by renewables. Approximately 80% of this renewable capacity came from customer-installed, small rooftop solar panel systems, while the remaining 20% came from utility-scale solar energy facilities.

Does St. Thomas have access to electricity?

The St. Thomas electric system, with about 175 megawatts of generating capacity, supplies electricity to St. Thomas, as well as St. John Island and Water Island. St. Thomas and the nearby islands are connected by underwater cables.

Is the US Virgin Islands a good place to start a wind farm?

The US Virgin Islands have been recognized as a regional leader in clean energy due to the success of collecting wind resource data for its first commercial wind farm. DOE's National Renewable Energy Laboratory has collected the necessary data for this project.

Do you need a solar water heater in the Virgin Islands?

Since 2009, new construction and major renovations in the Virgin Islands have required solar-powered water heaters to provide 70% of a building's heated water needs.

In a significant step forward for renewable energy in the U.S. Virgin Islands, Honeywell announced its collaboration with VI Electron on Tuesday. This partnership marks the beginning of an ambitious plan to implement the first of several advanced battery energy storage solutions (BESS) in up to six strategically placed solar parks across the territory.

The solar-plus-storage system is expected to fulfill 30% of the islands' energy consumption needs. According to the Department of Energy (DOE), the U.S. Virgin Islands have heavily relied on fossil fuels to generate ...

N2 - This profile provides a snapshot of the energy landscape of the U.S. Virgin Islands (USVI) - St. Thomas, St. John, and St. Croix. The Virgin Islands archipelago makes up the northern portion of the Lesser Antilles

and the western island group of the Leeward Islands, forming the border between the Atlantic Ocean and the Caribbean Sea.

**U.S. Wind Turbine Database.** The United States Wind Turbine Database (USWTDB) provides the locations of land-based and offshore wind turbines in the United States, corresponding wind project information, and turbine technical specifications. The creation of this database was jointly funded by the U.S. Department of Energy Wind Energy Technologies Office via the Lawrence ...

With support from the U.S. Department of Energy (DOE) and the Office of Energy Efficiency and Renewable Energy (EERE), the Virgin Islands set a goal of reducing fossil fuel use by 60% by 2025. Five years later that goal is ...

**U.S. Virgin Islands U.S. Department of Energy Energy Snapshot** Population Size 106,977 Total Area Size 350 Sq.Kilometers Total GDP \$3.98 Billion Gross Domestic Product (GDP) per Capita \$35,938 Share of GDP Spent on Imports 101% Urban ...

WASHINGTON, D.C.--In support of President Biden's Investing in America agenda, today the U.S. Department of Energy announced \$20.5 million in funding awarded to 32 states, territories, local governments, and Tribes through the Energy Efficiency and Conservation Block Grant (EECBG) Program.U.S. Secretary of Energy Jennifer M. Granholm made the ...

This profile provides a snapshot of the energy landscape of the U.S. Virgin Islands (USVI) - St. Thomas, St. John, and St. Croix. The Virgin Islands archipelago makes up the northern portion of the Lesser Antilles and the western island group of the Leeward Islands, forming the border between the Atlantic Ocean and the Caribbean Sea.

**U.S. Virgin Islands The U.S. Virgin Islands" Clean Energy Goals:** o Reduce fossil fuel-based energy consumption 60% by 2025 o Generate 30% of peak capacity from renewables by 2025. Government and Utility Overview Government Authority Ministry: Virgin Islands Energy Office Key Figure: Elmo Roebuck, Jr. Designated Institution for Renewable ...

NEW YORK - (February 29, 2024) The U.S Environmental Protection Agency (EPA) is directly investing in strategies to reduce climate pollution and build clean energy economy across the US Virgin Islands through the ground-breaking Inflation Reduction Act (IRA). EPA Regional Administrator Lisa F. Garcia joined Virgin Islands Energy Office Director Kyle D. Fleming, and ...

**Electric Vehicle Summit 2024: Pioneering Sustainable Transportation in the Virgin Islands.** U.S. VIRGIN ISLANDS - Virgin Islands Energy Office Director Kyle Fleming is pleased to announce that coming next month the territory will play host to the 2024 Electric Vehicle S...
